

Final Project Proposal

I would like to create a portfolio website for my last project. My target audience would be any future employers or people interested in my work. I wanted to create my own portfolio website, as I feel it will be useful to me in the future. I will showcase my Graphic Design work, Illustrations, and My Photography from the past three years I have studied at Towson and a few personal passion projects I have worked on.

My color scheme will be beige and neural colors, while I would typically chose pink, I want to highlight my work and have a professional looking page. I think I'll end up with a san serif font, but depending on what looks good it may become serif. Most likely Helvetica or Futura. I will have about 20 pieces total. Overall, I am looking forward to showcasing my work and building a professional looking and responsive webpage.
