Project Proposal

I would like to create a website about anime for the second website project. I want to do a deep dive into the most popular animes over the years as well as what is popular right now. Touching on the history of anime and some of the most influential characters. It's rise in popularity in 2020 will also be covered. My audience includes fans of anime, I believe the best way to organize this information will be in different sections like introduction, history, popularity, influence.

The name of the website will be Dream Anime- the source for anime information. I will need a cute anime logo that I will draw, most likely of my own original character. With this I can mix in my own images as well as finding images to serve as references to the text/ information. I would like it to be a very cutesy website that ties into the anime aesthetic.
