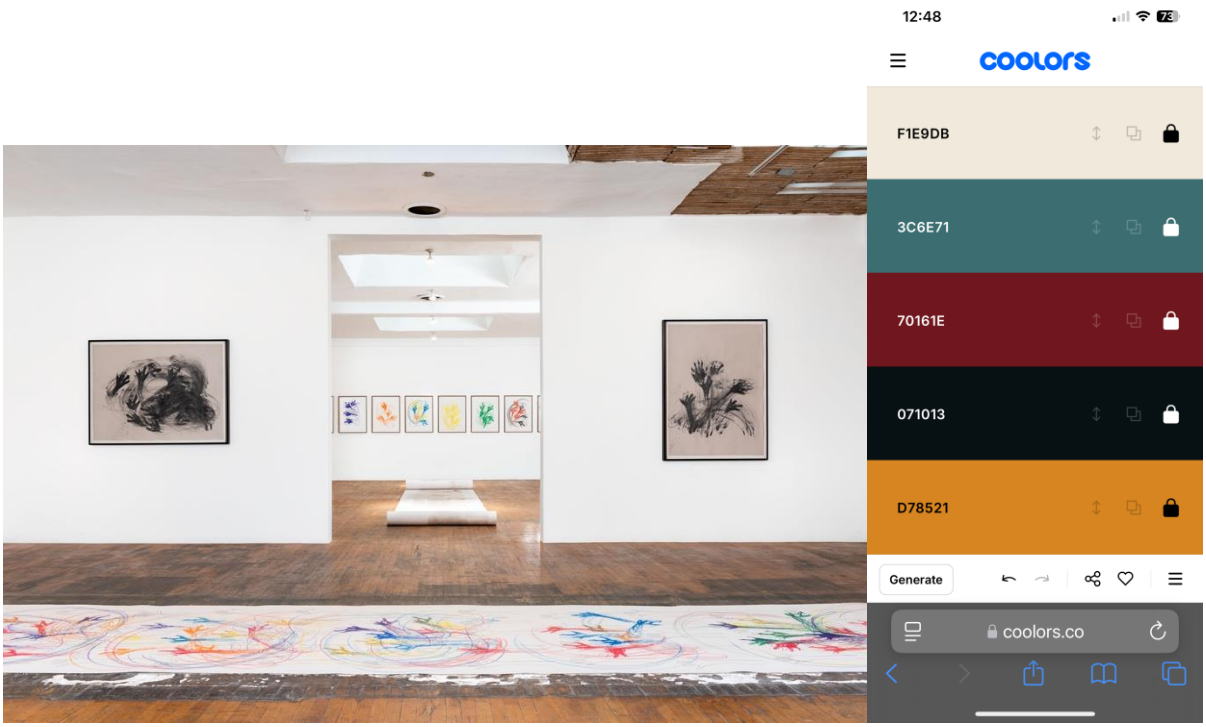
Project 1 Proposal

For my art exhibition website, I would like to showcase tattoo/body art. I would like to feature three artists I found on instagram. “Cheese” (@cheesecrybaby) creates stylistic, larger scale adornments with yellow accent colors, based in Los Angeles. Jasmine Chan (@novchild.jpg) creates beautiful floral designs and Asian imagery illustrations often in black, white, and bright accent colors, based in New York City. For the third artist, “Oozy” (@oozy_tattoo) I will focus on their porcelain-inspired detail work, also based in Los Angeles. The images I will choose will be photographs of their work on their clients and also flash design pieces. I would like it to take place at a gallery in LA, and I like the look of Commonwealth and Council. The theme will be recognizing tattoo design as fine art within a gallery space. Title: Everlasting Ink, maybe Skin & Ink, must decide. The website will be very clean, using neutral colors with accents of the colors used by each artist (yellow, red, light blue). I will have a home page that features the exhibition information, artists, and some images. I will create a page for each artist to show more of their individual work. These artists do not have a lot of personal information posted online, so I will try to dig to add to their artist’s profile.



Commonwealth and Council gallery in Koreatown, LA.
