For my final project, I would like to do a strawberry-themed makeup brand. I was thinking about making all the products either lip gloss or making a design for each product, such as: lip gloss, blush, eyeshadow, foundation, etc. I would have my website colors be white, red, and possibly pink. I want it all to scream strawberry! I've considered either just being strawberry-themed or making it chocolate-covered strawberry-themed. I'll make the mock-up in Figma since I'm familiar with it. For the website, I want to use either Bootstrap or Wix to truly bring my idea to life. I'm not sure if I'll do merch, but if I do I'll have makeup bags and make-up brushes in the store.
