Brennan Dill

San Juan Puerto Rico

I am going to create a website that highlights the adventures of San Juan. I recently traveled to San Juan a few years ago and found it to be such an eventful location. I feel that there is a lot that I can add to the website that makes it unique and fun to look at. I want to make the website a little more upbeat and exciting. I can do this by adding Puerto Rico's colors throughout the site and including videos of nightlife. I found Puerto Rico to be full of adventure when I visited so I want to portray the same kind of feeling into the website.

I looked at the examples and liked the idea of having images that pan through in a slideshow when the website is opened. Including images of everything to do and explore in Puerto Rico is something I want to be shown off right away. I want to incorporate a lot of pictures into this website. Looking at words talk about San Juan isn't very fun or interesting, but looking at pictures of Puerto Rico and the activities that take place is much more entertaining. I would like to have a page dedicated to different activities and foods that I tried while I was there. I found the nightlife in San Juan to play a big factor into my trip so I will be adding a page on the locations and activities that take place at night. I want this website to show people how unique Puerto Rico is and that visiting is not much of a difficult task.
