

## Proposal

For my final project, I plan to create a website for a yogurt drink I developed called Yog. Yog is a dairy-free yogurt smoothie designed as a great alternative for those who avoid dairy. The version of the drink I made was created for a special eclipse promotion, so the website will reflect that theme. It will include a homepage, an about page, a product page, and a contact page. Since I made four different flavors of the drink, I will showcase all of them on the product page.

For the color scheme, I plan to use dark, space-inspired colors like black, purple, and yellow to align with the eclipse theme. I'll opt for sans-serif fonts, as they complement the modern, clean aesthetic of my drink. The website will be tailored towards young adults, which was the target demographic I had in mind when creating Yog
