

For this project, I will be making a website for a ring brand called Ringos. Ringos is a 70s inspired brand that makes rings from antique spoons in order to emphasize sustainability and beauty from the past. It will include the logo and photography from my BFA project and have a home page, an about page, and a page to shop the rings. Below are some examples of what will be included on the website.

The logo for Ringos, featuring a stylized flower icon followed by the word "Ringos" in a cursive font.
