Project 2 Idea

For project 2 I am thinking about making a website about handmade fashion such as hand knit/ crochet/ sewed clothing. My audience would be anyone who is interested in arts and crafts, fashion and handmade items. I want to make a home page that describes what slow fashion is and how it works. For the next page, I was thinking of showing a gallery of images and then another page with resources on how you can get started making slow fashion items. I want the overall design to be clean, simple and modern with grayscale and a few accent colors. I will need to make a logo and plan on finding images on the internet.
