

## Project 2 Proposal

My project 2 research topic is dragons. This topic is not just chosen for aesthetic reasons but to dive deeper into their imaginative origins. I wanted to dive into why they were thought up and what could have caused the myths to sprout. Why do so many groups have a form of dragon when they were so far apart? I also wanted to dive into their cultural significance in today's world. How they are used and portrayed in media and what religions still hold them to high value today. Plus, they are cool.
