Design for the WWW II

Ryan T Smith

Project 2

The topic I want to use for Project 2 is sleep. I want to use this topic because it's a subject everyone does, but does not fully understand. I am also interested in the topic because it's one of my favorite activities to do in my free time. In addition, I want to learn the functions and types of sleep. I think the best way to present this website is by having a webpage with multiple pages describing and talking about sleep.

How I would design my website is by having a homepage about sleep. The homepage will just define what sleep is. Then I will have a sources page, which shows where I got information from. Then I'll have pages based on types of sleep, dreams, sleep cycles and sleep disorders. Also, I'm thinking about a page that talks about how sleep is viewed in different cultures. My website will also have a logo. The logo depicts a harp and sleep sounds. The logo is meant to represent how a harp can make you sleepy. The website will have a monochromatic color scheme. For the color scheme I am thinking about using purple and different shades of purple. I also will be using images I found on the internet for the website. My audience would be 18-24 year olds looking to improve their sleep.
