Final Project

For my final project, I am going to build the website for my portfolio. My audience will be the company's boss who want to look at my information and samples of my works clearly and formally. Their ages will be up to 30 years old. I'm going to showcase my 10 graphic design works that I did when I was in Montgomery College and Towson University. For the good user experience, I will make my homepage responsive, and make everything be 1 page with smooth scrolling.

My color scheme will be white for background, pink for navigation bar, and dark purple for the text color. I'm going to use Lucida Grande, Sans-serif, since I want my website to has high readability for the audiences.
