Design For WWII

The topic I'm focusing on is the music genre of R&B. If I need more specifics, I'm focusing on 90s R&B and how it came to be, what was so valued of it, and how it's influenced in today's R&B. My target audience focuses on people who love and appreciate 90s R&B music, particularly those who weren't around during the time to have a chance to appreciate it while it occurred.

The best way to present my information is to have a retro aesthetic for my website, fonts and designs inspired by 90s R&B album covers and photos. If possible, like the layout of 90s R&B CD information layouts, I want the website to scroll sideways. I'll make a logo, and find images of album covers, tour promos, photoshoots of the time, etc.
