

Branding Project Proposal

Kayla Joy

For my project I will be creating a portfolio website. I want it to be one long page, so it is easy to look through. I will also have a menu bar at the top for easy navigation. I want the page to be neutral colors, black, white, and tan. Each section/page will be a different color then the last and will have a line to break it up. I want my main page to have a picture with low opacity and my name on top in bold.

The next section will be my “about me” page. It will be simple and straight forward with a paragraph and a picture of me. Next will be my “portfolio”. I want to have a gallery like set up with captions underneath. It will also have a lightbox to show the different work in that series. The next page will be the “resume”. And “contact me” following it.
