

## Project Two Project Proposal

I propose my project two topic to be on the Bauhaus Movement. The Bauhaus art movement began in 1919 and ended in 1933. I have always been attracted to the art that was being produced during this movement because of the straightforward and modern designs and the use of shapes. This was also an interesting time for the world since World War 1 ended the year prior.

For this project, I could touch on the inspirations that influenced the Bauhaus Movement, the prominent figures within it, the Bauhaus itself, prominent works of the movement, what the Bauhaus Movement inspired, and the locations in which the Bauhaus Movement was the most prevalent. I believe a Bauhaus inspired design on a website could make for a very interesting design with lots of opportunities for creativity.

The target audience for this website would most likely be older people who appreciate art or students taking an Art History class. I wouldn't necessarily need a logo as the Bauhaus already has one, but I could modify it a bit to make a new original logo with the same objective. Media will be obtained through the internet as the Bauhaus Movement was a little over 100 years ago.
