31. Write a simple web page that describes yourself.

32. Write a PHP script that correctly illustrates the use of single-quoted strings, double-quoted strings, and here document strings.

33. Write a PHP script that prints out a table of Farenheit and Celsius temperature equivalents from −40°F to 120°F in five degree increments.

34. Write a PHP script that prints out all of the prime numbers between 1 and 100.

35. Write a PHP script that prints out all of the variables in the system arrays:
   - $_COOKIE
   - $_GET
   - $_POST
   - $_FILES
   - $_SERVER
   - $_ENV.

36. Write a PHP script that takes a string as input from a user, and should return to the user the length of the string. Use a GET method.

37. Repeat the previous problem, but with a POST method.
