Exam #1 Math 273

September 29, 2005

Key (Answers only, not work)

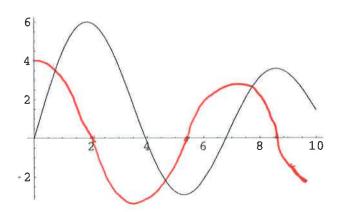

All questions are worth an equal number of points. All work is to be done on the blank paper provided. At the end of the exam, please hand in this sheet, together with all of your work.

§1 Calculation

- 1. Evaluate the limit $\lim_{h\to 0} \frac{\sqrt{h^2+9}-3}{h^2}$. $=\frac{1}{6}$
- 2. Find all of the horizontal and vertical asymptotes of the graph of the function

Improves of the graph of the function
$$f(x) = \frac{\sqrt{2x^2 + 1}}{3x - 5}.$$
Vertical @ $x = \frac{5}{3}$
horizontal @ $\frac{\sqrt{2}}{3}$

- 3x 5 horizontal @ $\frac{\sqrt{2}}{3}$ 3. Find the equation of the tangent line to the curve $y = x^2 + 2x$ that passes through the point (-3,3). y = -4x 9
- 4. Here is a graph of a function f(x). Sketch f'(x).

5. Find the derivative:

a.
$$y(x) = x^2 + 3x - 5$$
.
b. $f(x) = \frac{1}{x} + \sqrt{x}$
c. $g(t) = e^t - \frac{10}{\sqrt{t}}$.
The expression $2 \times + 3$
 $\frac{1}{x^2} + \frac{1}{2\sqrt{x}}$
 $e^+ + \frac{5}{4\sqrt{x}}$ (Not on our midterm)

$$g(t) = e^t - \frac{10}{\sqrt{t}}.$$

§2 Comprehension

- What is the informal definition of limit? What is the precise definition of limit? Use the precise definition to prove that $\lim_{x\to 2} (3x-1) = 5$. See book for definitions, For $\epsilon > 0$ let $\epsilon = \frac{\epsilon}{3}$. Then if $|x-2| < \delta = \frac{\epsilon}{3}$
- 7. Prove that $\lim_{x\to 0} x \sin \frac{1}{x} = 0$. Use this fact to prove that if By Squeeze thm,

-1x1 < x sm(1) < x

$$f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases} = \lim_{x \to \infty} \frac{f'(0)}{f(x) - f(0)}$$

then f is differentiable at x = 0. Find f'(0). $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$ $f(x) = \begin{cases} x \cos x & x$

9. What is the Intermediate Value Theorem? Use it to prove that there is a root of the equation

$$4x^3 - 6x^2 + 3x - 2 = 0$$

between 1 and 2.

This for is continuous b/c it is a polynomial.

between 1 and 2.

§3 Application $f(1) = -1 \quad f(2) = 12$ §3 Application

So $|VT| \Rightarrow T$ have $e_{X} \Rightarrow t$ 10. If an arrow is shot upward on the moon with a velocity of 58 m/s, its height in meters after t seconds |C| = 0is given by $h(t) = 58t - 0.83t^2$.

- a. What is the arrow's average velocity over the time interval [1, 2]? The interval [1, 1.1]? The interval [1, 1.01]?
- b. What is the arrow's instantaneous velocity after one second?
