

A signature always reveals a man's character - and sometimes even his name.

— Evan Esar

GUIDELINES

- All work must be shown for full credit.
- You can choose to use SageMath code to help you solve the problems. If you do, print out your code (or use the same folder as the latex code on SMC).
- Either print out this assignment and write your answers on it, or edit the latex source on SMC and type your answers in the document. Make sure you still show your work! There is one point of extra credit available on this assignment if you use \LaTeX .
- You may work with classmates, but be sure to turn in your own written solutions. Write down the name(s) of anyone who helps you.
- Check one:
 - I worked with the following classmate(s): _____
 - I did not receive any help on this assignment.

1. GRADED PROBLEMS

1. Exercise 7.6.11

2. Exercise 9.6.3

3. Exercise 8.8.2

4. Alice sets up an DSA key with the primes $p = 67$, $q = 11$, and the primitive root $g = 2$. Suppose she picks the secret number $a = 5$. Determine the rest of her public key, and sign the message $m = 17$ (supposing she picks $k = 3$. Verify that the signature is valid.
