

# MASON V(irtual) Mid Atlantic Seminar On Numbers

Schedule: March 27th 2021

	Room A	Room B
11:15 AM	Coffee and Mingling	
12:00 PM	Opening Remarks	
12:05 PM	<b>Jon Grantham</b> IDA/CCS Reversed Sum-Product Pairs	<b>Matteo Bordignon</b> U. of New South Wales Canberra Some new results on the explicit Pólya-Vinogradov inequality
12:35 PM	<b>Michael Mossinghoff</b> Center for Communications Research Wolstenholme and Vandiver primes	<b>Pengyong Ding</b> Pennsylvania State University On a variance associated with the distribution of real sequences in arithmetic progressions
1:05 PM	<b>Matthew Litman</b> University of California, Davis Distinct Residues of Lucas Polynomials over $\mathbb{F}_p$	<b>Steven Jin</b> University of Maryland An Elliptic Curve Analogue of Pila's Bound on Least Primitive Roots
1:35 PM	<b>Utkal Keshari Dutta</b> Sambalpur University Euler-Zagier multiple balancing-like L-functions associated to Dirichlet characters	<b>Amod Agashe</b> Florida State University A generalization of Kronecker's first limit formula with application to zeta functions of number fields
2:00 PM	Break	
2:30 - 3:25 PM	<b>Edray Goins</b> Pomona College Visualizing Toroidal Belyı̄ Pairs	
3:40 PM	<b>Wendell Ressler</b> Franklin & Marshall College Conjugacy classes and rational period functions for the Hecke groups	<b>Max Alekseyev</b> George Washington University Enumeration of Payphone Permutations
4:10 PM	<b>Ian Whitehead</b> Swarthmore College Apollonian packings and Kac-Moody Root Systems	<b>Christopher Keyes</b> Emory University An upper bound for the number of arithmetical structures on a graph
4:40 PM	<b>Hester Graves</b> IDA/CCS The abc conjecture shows that there are infinitely many s-Cullen numbers	<b>Lisa Cenek, Brittany Gelb</b> Amherst College, Muhlenberg College Interactive Theorem Proving with Lean
5:00 PM	Problem Session	

# MASON V(irtual) Mid Atlantic Seminar On Numbers

Schedule: Sunday March 28th 2021

	Room A	Room B
8:00 AM	Opening Remarks	
8:05 AM	<b>Shaoyun Yi</b> University of South Carolina <b>On counting cuspidal automorphic representations of <math>\mathrm{GSp}(4)</math></b>	<b>Damanvir Singh Binner</b> Simon Fraser University <b>The Number of Solutions to <math>ax + by + cz = n</math> and its Relation to Quadratic Residues</b>
8:35 AM	<b>Shashika Petta Mestri</b> Louisiana State University <b>Congruences for some partition functions</b>	
9:00 - 9:55 AM	<b>Edna Jones</b> Rutgers University <b>An Asymptotic Local-Global Principle for Integral Kleinian Sphere Packings</b>	
10:00 AM	Break	
10:35 AM	<b>Xander Faber</b> IDA / Center for Computing Sciences <b>Totally T-adic Functions of Small Height</b>	<b>Hayder Hashim</b> University of Debreceen <b>Diophantine equations involving linear recurrence sequences</b>
11:05 AM	<b>Vasily Bolbachan</b> Higher School of Economics, Moscow <b>Functional Equations for Elliptic Dilogarithm</b>	<b>Kisan Bhoi</b> Sambalpur University <b>Narayana numbers as sum of two repdigits</b>
11:35 AM	<b>Shivani Goel</b> Indraprastha Institute of Information Technology <b>Moments of Ramanujan Sums over Number Fields</b>	<b>Rafik Zeraoulia</b> University of Batna 2 <b>On congruence of the iterated form <math>\sigma^k(m) = 0 \pmod{m}</math></b>
12:05 AM	<b>Anwesh Ray</b> University of British Columbia <b>Arithmetic statistics and Iwasawa theory</b>	<b>Evangelos Nastas</b> SUNY <b>A Generalization of the Ramanujan-Nagell Theorem</b>
