### Project 3 ideas

For project three, I will be creating a branding site for an original product I made last year in community college called Angelic Mallow. Angelic Mallow is a skin care brand that use powdered marshmallows to make a facial cleanser, with one cleanser being peppermint scented for normal to combination skin and another cleanser for dry to sensitive skin with a blueberry scent.

I will be using some skin care brand sites to assist me with creating the site and all my images will be created with the use of mockups. The site will include a home page, about page, products page, and contact page. The color palette is gray, black, and white to make the site clean, though I am wondering if I should add another color.
